CAREER OBJECTIVE

Aspiring Backend Software Engineer with a specialized focus on building secure, high-performance, and scalable server-side web applications. Hands-on experience with designing RESTful APIs using Python and Django, with a current focus on asynchronous programming with FastAPI. Hands-on experience in database optimization to contribute to robust engineering teams.

EDUCATION

Bachelor of Science in Computer Science and Engineering

Feb 2024 – Sep 2027 (Expected)

Northern University of Bangladesh, Dhaka

- **CGPA:** 3.75 / 4.00
- Active participant in programming groups and technical workshops.
- Leadership in team-based software projects.

PROJECTS

ByteFeast Restaurant Management API

[Live Site](#) | [API](#) | [Docs](#) | [GitHub](#)

Django REST Framework, PostgreSQL, Swagger, JWT, React (Frontend)

- Architected a scalable backend system using DRF, focusing on complex relational data modeling and business logic.
- Implemented JWT-based secure authentication and granular role-based access control (RBAC).
- Optimized PostgreSQL query performance using indexing and `select_related/prefetch_related`.
- Documented self-describing RESTful endpoints via Swagger to ensure standard-compliant integration.

Talent Bridge Job Portal

[Live Site](#) | [API](#) | [Docs](#) | [GitHub](#)

Django REST Framework, PostgreSQL, Swagger, JWT, React (Frontend)

- Engineered a robust job-matching backend, handling complex filtering logic and multi-table relationships.
- Designed secure data schemas for job seeker profiles and employer management systems.
- Integrated automated token-based authentication protocols for secure stateless client communication.

NUB Event Management System

[Live](#) | [GitHub](#)

Django, TailwindCSS, PostgreSQL

- Developed a university event platform with server-side Role-Based Access Control (RBAC).
- Engineered RSVP logic and event participation tracking with real-time database updates.
- Deployed the application on Render ensuring continuous availability and environment configuration.

SKILLS

- **Backend Engineering:** Python, Django, Django REST Framework (DRF), REST API Design, JWT
- **Currently Learning:** FastAPI (Asynchronous Web Frameworks), Microservices Architecture
- **Databases & Storage:** PostgreSQL, MySQL, SQLite, SQL, Database Management System
- **DevOps & Tools:** Git, Docker (Basics), Postman, Linux CLI, Vercel, Render
- **Supporting Frontend:** React.js, TailwindCSS (Focused on internal dashboarding/prototyping)
- **Soft Skills:** Problem Solving, Teamwork, Technical Communication
