CAREER OBJECTIVE

Backend Software Engineer with a specialized focus on building secure, high-performance, and scalable server-side web applications. Hands-on experience with designing RESTful APIs using Python and Django, with a current focus on asynchronous programming with FastAPI. Dedicated to creating and maintaining robust and optimized RESTful APIs.

SKILLS

- **Backend Engineering:** Python, Django, Django REST Framework (DRF), REST API Design, JWT
- **Currently Learning:** FastAPI (Asynchronous Web Frameworks), Microservices Architecture
- **Databases & Storage:** PostgreSQL, MySQL, SQLite, SQL, Database Management System
- **Technical Tools:** Git, GitHub, Linux, Vercel, Render
- **Supporting Frontend:** React.js, TailwindCSS (Focused on internal dashboarding/prototyping)

PROJECTS

ByteFeast Restaurant Management API

[Live Site](#) | [API](#) | [Docs](#) | [GitHub](#)

Django REST Framework, PostgreSQL, SSLCommerz Integration, Swagger, JWT, React (Frontend)

- Architected a scalable DRF backend with complex relational modeling and core business logic.
- Integrated SSLCommerz for secure payments and guaranteed transaction integrity.
- Optimized DB performance using PostgreSQL indexing and query optimization (`prefetch_related`).
- Developed self-describing API documentation via Swagger for seamless frontend integration.

Talent Bridge Job Portal

[Live Site](#) | [API](#) | [Docs](#) | [GitHub](#)

Django REST Framework, PostgreSQL, Swagger, JWT, React (Frontend)

- Engineered a job-matching engine with complex filtering and optimized multi-table relationships.
- Designed secure schemas for applicant/employer management with stateless JWT authentication.
- Enhanced search efficiency by implementing PostgreSQL indexing on high-traffic data tables.

NUB Event Management System

[Live](#) | [GitHub](#)

Django, PostgreSQL, TailwindCSS, Render

- Developed a full-stack platform featuring server-side Role-Based Access Control (RBAC).
- Engineered real-time RSVP tracking and database updates for university-wide event coordination.
- Automated deployment workflows on Render with managed environment configurations.

EDUCATION

Bachelor of Science in Computer Science and Engineering

Feb 2024 – Sep 2027 (Expected)

Northern University of Bangladesh, Dhaka

- **CGPA:** 3.75 / 4.00
- Active participant in programming groups and technical workshops.
- Leadership in team-based software projects.

LANGUAGES

- **English:** Full Professional Proficiency.
- **Bengali:** Native Proficiency.
